## **Opgave 427**

$$v = 254$$
 $l = 9$ 
 $x = l \cdot \cos(v)$ 
 $x = 9 \cdot \cos(254) \approx -2,480736$ 
 $y = l \cdot \sin(v)$ 
 $y = 9 \cdot \sin(254) \approx -8,651355$ 
 $P_{slut} = (x, y)$ 
 $P_{slut} = (-2.48, -8.65)$
