Opgave Sys 612

 $f'(x) = \ln(x)$

Find stamfunktion

$$F(x) = \int \ln(x) dx$$

$$F(x) = \ln(x) \cdot x - x + K$$

Find funktion der går gennem punkt P

$$P(1;1)$$

$$F(1) = 1$$

$$\ln(1) \cdot 1 - 1 + R$$

$$ln(1) \cdot 1 - 1 + K = 1$$

$$K = 1 - ln(1) \cdot 1 + 1$$

$$K = 2$$

$$F(x) = \ln(x) \cdot x - x + 2$$

Cas

$$F(x) = \int \ln(x) dx$$

$$Define: F(x) = \ln(x) \cdot x - x + K$$

$$F(1) = 1$$

The equation is solved for K by WordMat.

K = 2
