Opgave 371

$$f(x) = \sin(2x)$$

$$F(x) = \int \sin 2x \, dx$$

Define:
$$F(x) = -\frac{1}{2}\cos 2x$$

$$A = [F(x)]_0^{\frac{\pi}{2}}$$

$$A = [F(x)]_0^{\frac{\pi}{2}}$$

$$A = F(\frac{\pi}{2}) - F(0)$$

$$A = 1$$
